- A problem-solver with good programming skills and a hardworking mentality. Seeking to apply expertise and extensive experience to take on a challenging new role with a growing team.

SKILLS

- **Html5, CSS3, BootStrap**
- **Javascript, OOJS, jQuery**
- **Angular JS, Angular 6,8**

EXPERIENCE

NETCRACKER TECHNOLOGIES AS A SOFTWARE ANALYST

SEPTEMBER 2019 – PRESENT

- Initially started with fixing bugs and later moved onto developing small features for the product.
- Later, moved to demo team and started handling a team of 6 members comprising both front-end and back-end developers.
- I conduct discussion meetings with the sales engineers and designers over the mockups and then do the technical discussion with the team before outlining the tasks.
- I have created a code review process which has to be strictly followed by the front-end team.
- I am also responsible for keeping track of all the bugs reported and distributing them according to the priority.

INFOSYS AS A TECHNOLOGY ANALYST

DECEMBER 2017-MAY 2019

- Worked on **Angular (version 6.0)/JavaScript** based Web Application for Adecco group.
- It's a web application for clients who can create orders/events and request for staff like caterers, waiters, cook etc.
- Developed and refactored various modules of the application.
- I have worked as a module lead in a team of 4 members working on a

product backlog item (PBI).

- Consistently met deadlines and requirements for all PBIs.
- Proposed technical feasibility solutions for new functional designs and suggested Options for performance improvement of features already in place.
- Coordinated with UX designers to finalize wireframes and confirm requirements.

WIPRO TECHNOLOGIES AS A PROJECT ENGINEER

MARCH 2014 – DECEMBER 2017

- Received training in Mobile/Web application development tools.
- Performed initial client assessment and analysis to begin research process.
- Started working on front-end framework Angular JS.

PROJECTS

HEATHCARE APPLICATION (Wipro)

- Developed a mobile application for AstraZeneca's patients in which they can keep track of their medicine timings, appointments.

INTERNAL APPLICATION (Wipro)

- Developed UI for an application to monitor various business units in Wipro.

E-COMMERCE APPLICATION (Wipro)

- Developed a module named "Browse Catalogue" in the mobile application for browsing through the available products.

CAPEX MANAGEMENT MODULE (Wipro)

- Developed a module specifically for the "Driver Hub" web application for monitoring the revenues.

STAFFING APPLICATION (Wipro)

- It's a web application for clients who can create orders/events and request for staff like caterers, waiters, cook etc.
- Developed and refactored various modules of the application.
- I have worked as a module lead in a team of 4 members working on a product backlog item (PBI). The PBI was to create the screen which was divided into three sections, language preferences of the user logged in, templates for previously created orders, templates for already used roles.
- I was responsible to divide the tasks amongst the members according to the capabilities of each one of them, deciding on the timelines for each task and adhering to it.

SALES FORCE AUTOMATION (NetCracker)

- It's a sales management application where one can create and manage leads, opportunities, accounts of converted leads. Also, on the application's dashboard we can see the summary of all the entities like lead, contact, opportunity, account etc.

EDUCATION

- Bachelor of Engineering(Electronics&Telecommunication) from Shri Govindram Seksaria Institute of technology and Science, Indore (Madhya Pradesh) in 2013 with 70.31% aggregated marks
- 12th (Mathematics and Science) from Maharishi Vidya Mandir School, Jabalpur (Madhya Pradesh) with 77.40% marks.
- 10th from Maharishi Vidya Mandir School, Jabalpur (Madhya Pradesh) with 84.4% marks.
