SUMMARY

- Offering 7 years of experience in Web App Development.
- Good knowledge of responsive web designing.
- An effective communicator with decent interpersonal and analytical abilities.
- A problem-solver with good programming skills and a hardworking mentality.

SKILLS

- **JavaScript, TypeScript, Angular 8, HTML, CSS, SASS, LESS**
- **GitHub, FireBase, RestAPI, GraphQL, RxJS, Figma**

EXPERIENCE

SEPTEMBER 2019 – PRESENT
Senior Software Engineer, **Netcracker Technology**

- Worked on style issues, refactored the code using latest features of Angular, RxJS, built standalone functional modules using HTML,CSS and Angular.
- Moved to demo team and started handling a team of 6 members comprising both front-end and back-end developers.
- Conducted discussion meetings with the sales engineers and UX designers over the mock-ups and discussing with team before outlining the tasks.
- Created a merge request review process for GitLab which has to be strictly followed by the front-end team.
- Responsible for keeping track of all the bugs reported and distributing them according to the priority.

Project - Sales management application to maintain customers data, newly introduced products, customer queries etc.

DECEMBER 2017-MAY 2019

Technology Analyst, Infosys

- Started with Angular 2, TypeScript, SASS and developed small features in the application.
- Coordinated with UX designers to finalize wireframes and requirements.
- Worked as a module lead in a team of 4 members working product backlog items. I was responsible to divide the tasks amongst the members according to the capabilities of each one of them, deciding on the timelines for each task and adhering to it.

Project - Web application for clients who can create orders/events and request for staff like caterers, waiters, cook etc.

MARCH 2014 – DECEMBER 2017

Project Engineer, **Wipro Technologies**

- Received training in Mobile/Web application development tools.
- Worked on mobile/web applications with frameworks like BackboneJS, AngularJS.
- Sole developer for an entire feature module in a web application based on AngularJS, JavaScript.

Project – Developed a web application named capex management monitoring the revenues.

EDUCATION
